Antitrust Guidelines

Meetings of Secure Technology Alliance members and participants necessarily involve cooperation of industry competitors. Accordingly, it is the express policy of the Alliance to require that all of its activities be conducted strictly in accordance with applicable antitrust laws. It is therefore extremely important that attendees adhere to meeting agendas, comply with the Secure Technology Alliance bylaws, U.S Payments Forum and Identity and Access Forum Operating Guidelines and Alliance Antitrust Guidelines, and at all times, be aware of and not participate in any activities that are prohibited under applicable US state, federal or foreign antitrust laws.

Examples of types of actions that are prohibited at Alliance meetings and in connection with its Activities are: price fixing, agreements to allocate customers or markets, boycotts and other "concerted refusals to deal", as well as discussion of or agreements regarding discriminatory pricing, discounts, incentives, awards, penalties, compliance and enforcement programs and other related matters. Any discussion of such activity is strictly prohibited.

If you have questions about these matters, please contact your company counsel, or if you are Alliance member, feel free to contact Jason Bohrer, who will put you in contact with Alliance counsel.
